Guidelines for Capturing Palmprints and Supplementals
Guidelines for Capturing Palmprints and Supplementals

General Overview:
• The FBI will implement palmprint and supplemental print search capabilities as part of its Next Generation Identification (NGI) effort
• As of July 2010, the FD-884 (10-28-99) and FD-884a (5-07-07) have been revised and will be available in the near future. This guideline represents the final state, in which the only change made is the orientation of the text within the same capture block. Existing cards will be accepted; however, please ensure that the capture of the friction ridge information is oriented as depicted within this guide
• Orientation guidelines are provided for your reference

Hand with basic regions noted:
Hand with basic regions noted:

- Distal
- Medial
- Proximal

Palm

Hypothenar/Writer’s Palm

Thenar (Ball of Palm)

Rolled

Left Side

Flat

Right Side

Note: For more information please see Electronic Biometric Transmission Specification (EBTS) at www.fbibiospecs.org
Form 884: Palmprint Card (Front Side)

This guide is for print orientation purposes only
- To ensure standard capture of each print, all fingers/tips/palms must be oriented in the direction of the text within the capture block
- Each impression must be captured completely within the box provided in a vertical, upright position

**Writer’s Palm Impression:**
Ulnar side of hand placed in a vertical, upright position with base of wrist in line with edge of card and fingertip oriented in direction of text within the capture block.

**Palm Impression:**
Circle left or right palm orientation. Orientation of palm must mirror image of palm illustration in a vertical, upright position with base of wrist in line with edge of card and fingertips oriented in direction of image.

**Index Finger:**
Roll finger with tip oriented in direction of text within the capture block

**Note:**
Purpose is to verify palmprint with tenprint.
Form 884: Palmprint Card (Back Side)

This guide is for print orientation purposes only
Thumb/Index/Middle/Ring/Little:

- Using the same hand printed on the front side of the card, roll each finger in the appropriate block
- Each impression must be captured completely within the capture block provided in a vertical, upright position with fingertips oriented in the direction of text

Note:
Area above rolled prints needs to remain blank.
Form 884a: Supplemental Finger and Palmprint Card (Front Side)
This guide is for print orientation purposes only

• To ensure standard capture of each print, all fingers/tips/palms must be oriented in the direction of the text within the capture block
• Each impression must be captured completely within the box provided in a vertical, upright position

Note:
Select Left or Right hand. Images must be captured in the following sequence: *fully rolled, left edge, flat, right edge* impressions.

**Thumb Tip:**
Orient tip of thumb in direction of text within the capture block.

**Thumb:**
Orient thumb in direction of text within the capture block.
Capture one *fully rolled* thumb impression.
Capture one *left edge* thumb impression.
Capture one *flat* thumb impression.
Capture one *right edge* thumb impression.

**Index Tip:**
Orient tip of index finger in direction of text within the capture block.

**Index:**
Orient index finger in direction of text within the capture block.
Capture one *fully rolled* index finger impression.
Capture one *left edge* index finger impression.
Capture one *flat* index finger impression.
Capture one *right edge* index finger impression.

**Thenar:**
Orient ball of palm in the direction of text within the capture block with base of wrist in line with edge of card. Obtain an impression.
Form 884a: Supplemental Finger and Palmprint Card (Back Side)
• This guide is for print orientation purposes only
