ABOUT TRITECH

A leader in the forensics market, Tri-Tech Forensics provides evidence collection and crime scene investigation products and training to crime labs and crime scene investigators throughout the world. With over 30 years of experience, we are the nation's most proficient developer and manufacturer of forensic kits. We are committed to providing our customers with state-of-the-art forensics products and services at affordable prices. It is our goal, through our research and development program, to continue to develop superior products and training to aid in all aspects of crime scene investigation and crime lab analysis. We know how important our products and training are to the forensics community, from investigation to prosecution, Our mission is the same as our customers – *Identify. Protect. Preserve.*

Investigative Analysis & Crime Scene Reconstruction

Comprehensive and accurate analysis of evidence will make or break a case, and it ultimately determines if justice is served, whether the case is a property crime, assault, or death investigation.

Investigative Analysis and Crime Scene Reconstruction is a challenging, forty hour course, designed by veteran field experts for detectives, crime scene investigators, evidence technicians, and others involved in crime analysis. Through both lecture and practical exercises, investigators expand their skill sets by learning and practicing accepted, tested methodologies for objective analysis of evidence. This is not a crime scene processing course; it is, rather, an exploration of expanded ways of thinking about information and evidentiary relationships in investigations.

Class Requirements:

Prior investigative or crime scene experience and basic familiarity with bloodstain patterns is helpful. Course materials are provided in electronic format. Attendees should bring an electronic device with USB connection and basic office suite software, such as a laptop computer, to access, prepare and save digital work product, case materials, and complete fillable forms used in lecture and practical exercises.

A Student Speaks:

"The crime scene reconstruction course by Gary and Iris Graff was an incredible learning experience. The knowledge and experience Gary and Iris brought to the class was invaluable and their focus on scientific methodology and fact based objective analysis should be a model for all crime scene analysis training".

- Brian Smith, Georgia Bureau of Investigation

— COURSE INSTRUCTORS —

GARY GRAFF, CBPA

Gary W. Graff, retired FBI Special Agent, investigated violent crimes, sex crimes, fraud and property crimes. He specialized in complex cases, many of which were coordinated with state and local law enforcement.

He has substantial trial and testimonial experience and extensive training and experience in crime scene processing, sketching and reconstruction, shooting incident reconstruction, and blood stain pattern analysis. He was a certified police instructor, SWAT member and instructor, firearms instructor, and member of the FBI's Evidence Response Team. Mr. Graff has a Bachelor of Science degree in Electrical Engineering and is a graduate of the FBI National Academy. He provides instruction in general investigative methods, crime scene and shooting incident reconstruction and bloodstain pattern analysis.

IRIS DALLEY

Iris Dalley Graff served as a Special Agent for the Oklahoma State Bureau of Investigation (OSBI), retiring in 2009. During her career, she conducted laboratory analysis, crime scene investigation, and worked with various police agencies in processing and investigating hundreds of violent crime cases. Iris has a B.S. in Biology and Masters in Secondary Sciences. Iris is a Fellow and Distinguished Member of the Association for Crime Scene Reconstruction and former president of the International Association of Bloodstain Pattern Analysts. Iris has decades of experience in providing case consultation, expert testimony, forensic analysis and instruction in bloodstain pattern analysis, crime scene reconstruction, and shooting incident reconstruction, in the United States and other countries.
